- Great impact on the product.

DareIT / Frontend Mentor
11..2021 - 03.2022
Dare IT is an organisation that supports women in starting and developing their career in IT. For 4 months I've been working with my mantee on her programming skills development.

- Sharing my professional path and experiences.
- Guiding professional development and career growth.
- Performing recruitment interviews as part of exercises.
- I was teaching mantee the fundamental principles of Javascript, Typescript and React.
- Providing whatever else supports my mentee needs.

Esvelo (former VentureDevs) / Mobile Engineering

Manager
06.2021 - 11.2021

- Defining and managing processes.
- Conducting One on One's, making sure everyone in the team has what they need.
- Supporting developers in their career paths.
- Recruitment.
- Creating solutions that simplify the work of the team (technical documentation, new solutions like Bitrise instead of AppCenter).
- Due to the fact that the company worked on crypto projects, I've learned the technical aspects in this area (Ethereum blockchain).

VentureDevs / React Native Developer
01.2020 - 06.2021

Trubify
04.2020 - 06.2021
An app for musicians and fans to stream live concerts.

- React Native, Firebase.
- Start and configuration of the project.
- Configuration of CI (AppCenter)
- Implementation of new features.
- Great impact on the product.
- I was fully responsible for creating a native module based on the Streamaxia SDK (video live streaming) for React Native. Used Swift and Java.
- I was fully responsible for the implementation of in-app payments for both platforms.

Lyric
01.2020 - 04.2020
An application similar to Airbnb or Booking.com, offered the booking of exclusive apartments.

- React Native.
- Close work with the team from the US in Scrum (worked on-site for 3 months).
- Implementation of new features.
- Existing code refactor.
